
CASE STUDY NO. 58

Local Breakfast Ingredient Kit

TOPIC

AgriBusiness – Value-Added Product

PRESENTED BY

Lokendra Joshi

58

THE REAL COST OF BREAKFAST IS THE

FRICTION

around cooking.

PILOT GEOGRAPHY

KHARGHAR

Educational institutions
Residential clusters
Young consumers

30-DAY VALIDATION

PG density
Demand concentration
Distribution access

EFFORT BUILDS AT EVERY STEP

WHAT STUDENTS AND YOUNG PROFESSIONALS DO TODAY

PG MESS
Fixed

OUTSIDE
Bought

SELF-COOK
Effortful

INSTANT
Packaged

SKIP
Nothing

Start narrow: PG residents with breakfast friction

Self-cooked without the usual work of self-cooking.

PRIMARY

BREAKFAST FRICTION

NEED

Affordable + convenient + self-prepared

SECONDARY

≤10

MINUTES PREP · TARGET

1-2

VESSELS · TARGET

Pilot hypotheses — to be validated

Position between instant convenience and self-cooking

HIGH CONVENIENCE

+ HIGH CONTROL

+ LOW PREP EFFORT

Instant-food convenience
with a **self-prepared**
experience.

SELF-COOKING

READY-TO-COOK

Win the first customer through experience, then build habit

EXPERIENCE · STEP 2

PGs · Colleges · Corporate events
Taste + speed + simplicity

HABIT · STEP 4

Breakfast Week
Multi-kit bundles

DISTRIBUTION · STEP 6

PG bulk · Pickup points
Selective delivery · future quick-commerce

STRATEGIC PRINCIPLE

Concentrate demand before expanding distribution.

Affordable convenience with positive unit contribution

~45%

CONTRIBUTION MARGIN · BEFORE OTHER COSTS

5
servings

₹29.80
per serving

kits / month capacity

1,500
KITS / MONTH

→ ₹2,23,500
REVENUE

→ ₹1,23,000
ASSEMBLY + PACKAGING

→ ₹1,00,500
CONTRIBUTION
BEFORE OTHER OPERATING COSTS — NOT PROFIT

NOT YET INCLUDED

- Delivery
- Sampling
- Marketing
- Discounts
- Payment fees
- Storage / wastage

Final economics depend on distribution and operating costs.

90 days to validate before scaling

FIVE SCALE GATES

Build a hyperlocal convenience-breakfast business first. Scale only after the model proves repeatable.
